## STRATEGIC GRANT SEEKING WORKSHOPS

Kerry Anderson's Strategic Grant Seeking Workshops are practical and insightful for community groups and not-for-profits. Kerry has extensive experience as a successful grant seeker raising \$5 million for a hospital redevelopment; and, at the other end of the spectrum, as Grants Manager of FRRR, a philanthropic foundation, distributing millions of dollars Australia wide. From 2012 to 2015 Kerry was a member of the Regional Development Australia Loddon Mallee Committee that guided major regional investment through the Australian Government Regional Development Fund and Victorian State Government Regional Growth Fund.

### Half or Full Day Workshop

This practical workshop with hands on activities will assist participants to understand what type of projects are eligible for funding, the grant application process, and how to write an effective submission. Participants will also explore a broad range of funding avenues and stakeholder relationships. Most important of all, they will be encouraged to think strategically to increase the benefits to their organisation and the wider community.

*“Kerry was very easy to listen to and made people welcome - a practical workshop with activities and examples.”*

*“Great knowledge and tailored to suit all projects.”*

*“Kept me engaged for 3 hours - and after a tooth extraction!”*
